APPLIED MATHEMATICS COLLOQUIUM

Date: Monday, July 13, 2015
Time: 2:30 – 3:30 p.m.
Location: Middlesex College Room 204

Mathematical modeling for intracellular transport and binding of HIV-1 gag proteins

Dr. Xiufen Zou
School of Mathematical and Statistical Sciences,
Wuhan University

Abstract:

In this talk, the applications of mathematics in the research of complex diseases are introduced. Specifically, I first present a modeling study for the intracellular trafficking and assembly of the HIV-1 Gag proteins. Then, I present the analysis of pathogenic mechanisms of influenza A virus (IAV) by combining mathematical model-based optimization and dynamical analysis.
